Other Projects

Developing Autograder for the Deep Reinforcement Learning Course *August 2022 - Present*
- Developed and designed test cases for CSCE 642 Course at Texas A&M University.
- The autograder is being also used by other universities.

Sampling an action from a Q function in continuous action spaces *August 2021 - May 2022*
- investigating various sampling techniques, to efficiently sample actions from the q function which would resemble Boltzmann sampling in discrete space
- proposed method would enable agents to have better exploration than sota algorithms like DDPG, and would not have any assumptions on distribution like SAC
